Your Liquor Liability Coverage Responding to Changes in Your State

Hospitality insurance is working hard to help policyholders ease the financial struggles created by COVID-19. We are adjusting coverage to fit the changing circumstances that are occurring on a state by state basis. **For those states allowing take out liquor sales we will extend our policy to provide liquor liability coverage. Businesses must follow the guidelines put in place by the controlling authority in their state.**

Please refer to [this link](#) to review our state by state chart that includes a link to the most recent information from each of our operating area's state liquor control agency. Please keep in mind that these items are fluid and we will do our best to monitor each state's activity and work with our restaurant association partners to provide you with current information.
